

Our Purpose

The Texas Foreclosure Prevention Task Force (Task Force) is a network of individuals and organizations working collaboratively to avert home mortgage foreclosures and the impact of foreclosure on Texas families and communities.

This is accomplished primarily by connecting at risk homeowners with FREE HUD-approved housing counseling providers.

This year, the Task Force has worked actively to raise awareness about loan modification scams.

Our Mission

To support at-risk homeowners by connecting them with FREE U.S. Department of Housing and Urban Development (HUD) approved housing counseling services available throughout the State of Texas, while leveraging our collective fiscal, in-kind, and intellectual resources to support these trusted advisors and their organizations with capacity building resources such as funding, specialized training, marketing and outreach services.

Who We Are

Founded in 2007 by NeighborWorks America, we are comprised of more than 100 organizations representing State, Local and Federal, Non-Profit, Private, Public, and Philanthropic interests along with the Lending and Servicing Community all working together to stem the tide of foreclosures in Texas.

How We Help

The Task Force promotes FREE HUD-approved housing counseling in Texas by making information available about ways for at-risk homeowners to connect with these agencies – by e-mail, phone or by making an appointment to sit down with a counselor who is specially trained in foreclosure prevention.

We also support the NFMC network of agencies in Texas.

We provide support to local Task Force coalitions who conduct local outreach to homeowners facing foreclosure.
