

Senators:

Illegal aliens burden our schools, hospitals, courts, prisons, 911, law enforcement, churches, social services, local, state and national charities... maintenance of all these and more.

Their additional millions increase pollution and overburden landfills, deplete our resources - water, fuel, minerals, etc., even jobs.

They diminish the morality of our nation by the encouragement of aiding and abetting concealment and production of counterfeit documents.

Alien language impediments cause accidents and other transportation problems.

Family members abroad, often numerous, are encouraged to violate our borders.

Remaining politically active since Goldwater's run, my family, friends, neighbors and political allies are resolved that all our elected representatives should immediately voice and vote support for Arizona's Border Control Legislation. Find the will, courage and commitment to enact the same for Texas.
