Regarding: Senate

Message:

The current proposal for SD-31 and SD-28 creates huge geographical regions. The current proposal for SD-31 stretches from the Texas/ Oklahoma border all the way to Junction on I-10 (and not even in a direct route). This is a huge area with differing interests, industries, and transportation needs. SD-31 should include Midland, Odessa, San Angelo, and Abilene while SD-28 should include Lubbock and Amarillo. These communities are already intertwined in that their high school districts are together; people commonly travel from amongst these communities. This geographical grouping would connect the counties in each district allowing the people's elected representative to be more in tune with the collective needs of the people of the district.
